```
SELECT pt1.id as P1, pt2.id as P2,
       ABS(pt2.x_value - pt1.x_value)*ABS(pt2.y_value-pt1.y_value) as AREA
  FROM Points pt1 JOIN Points pt2
    ON pt1.id!=pt2.id
   AND pt1.x_value!=pt2.x_value
   AND pt2.y_value!=pt1.y_value
 ORDER BY AREA DESC, p1 ASC, p2 ASC;
```
