```
select a.company_id, employee_id, employee_name, round(salary*(1-tax),0) as salary
from Salaries a
join
(select company_id,
       case when max(salary) < 1000 then 0
             when max(salary) >= 1000 and max(salary) <= 10000 then 0.24
             else 0.49
       end as tax
  from Salaries
 group by company_id) b
on a.company_id = b.company_id
```
