```
select
activity
from friends
group by activity
having count(id) not in
(
    select
        max(cnt) as cnt
    from
        (select
            activity,
            count(id) as cnt
        from friends
        group by activity) tmp1

    union

    select
        min(cnt) as cnt
    from
        (select
            activity,
            count(id) as cnt
        from friends
        group by activity) tmp2
)
```
